

ROGELLI SPORTSWEAR

Rogelli Sportswear was founded in 1974 and bought by Rini Wagtmans in 1992. The well-known Dutch cyclist rode the French Alpes and Pyrenees several times in his professional career. In the Tour de France this brought him once the yellow jersey, three stage wins and a fifth and six place in the general classification. He rode all his races with old acrylic jerseys, which were not comfortable and heavy due rain and perspiration. That's why Rini went looking for new technologies and improved fabrics that would turn-around the world of sportswear. His search brought him in Italy and imported this revolutionary technology to the Netherlands; Rogelli Sportswear was born.

Our mission is to inspire and motivate athletes to have fun while working-out. We strongly believe that we make sport clothes which makes everyone happy. Our clothing is made of the best fabrics with the right functionality. With our gear we would like to contribute to your happiness which makes sure you stay motivated for the long time.

EYEWEAR TECHNOLOGIES

All Rogelli glasses are provided with polycarbonate lenses:

- · lightweight
- · very clear
- decentred
- scratch resistant
- 100% UV400 protection
- resistant against extreme temperatures

Easily take the lenses out of the frame and simply click in a pair of alternate lenses. In that way, the glasses are suitable for every weather situation.

ADJUSTABLE TEMPLE TIPS

The hypoallergenic rubber temple tips can be shaped to the face contours. In that way, the glasses are comfortable for everyone.

ADJUSTABLE NOSEPTECE

The nosepiece can be shaped to the nose contours. In that way, the glasses are comfortable for everyone.

TR90 MATERIAL

TR90 is a lightweight and flexible fabric. Thereby, the glasses are bendable and have a high fracture resistance. TR90 safe guards quality and sustainability.

CLEANING POUCH INCLUDED

The pouch which is included, also functions as a cleaning cloth for the lenses.

CLEAR

These transparent lenses allow nearly every ray of a clarity and can brighten light. Wear them at night to keep wind, bugs and dirt out of your eyes.

Best for night riding

YELLOW

The sunny hue increases colors (and vour disposition). The tint helps lights from yellow ones. objects pop against dark or gray backgrounds.

Light transmission 90-95% Best for stormy weather Light transmission 70-90%

SMOKE

This darker, neutral shade won't distort colors, which increasing coating which means you can discern red provides mirror lenses. But it enhances contrast less than colored tints.

Best for sunny days Light transmission 15-18%

REVO

Revo is a contrast Because they make objects appear darker, mirrored coatings often are paired with lighter shades.

Best for glaring sun Light transmission adds 3-7%

PHOTOCHROMIC

Photochromic lenses are ideal for cycling. These lenses darken on exposure to specific types of lights, for example bright sunrise. In absence of activating light, the lenses return in clear state. This way, you don't need to change your lenses depending on the light.

SIZECHART

Every body is built differently. At Rogelli we strive to find suitable clothes. Rogelli uses three kinds of fits, namely comfort, race and pro.

COMFORT FIT RECREATIVE

The Comfort fit is especially made for those who prefer pleasure and comfort over aerodynamics, for example the recreational rider.

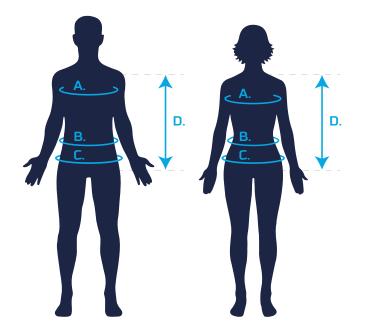

RACE FIT COMPETITIVE

The focus of the Race fit lies on endurance using comfortable and supportive performance fabrics for long distance races. It's not as slim fitted as compression shirts, but it's a good mix of aerodynamics and comfort.

PRO FIT PROFESSIONAL

The Pro fit is for the competitive cyclist who prefers technology, innovation, lightweight materials, aerodynamics and love to wear a shirt as their second skin.

SIZECHART (cm) Top men	S	М	L	XL	2XL	3XL	4XL	5XL

ROGELLI **DISTRIBUTORS**

Size A: To measure your chest, place the measuring tape just under the armpit and measure the fullest part of the chest. Women: place the measuring tape just below the armpit and measures around the chest.

Size B: To measure your waist, place the tape measure at the narrowest point of the waist.

Size C: To measure your hip size, place the measuring tape at the widest point of the hips.

Size D: Is the length from the top of the back to where the bottom of the shirt should come.

ICONS

4 WAY STRETCH

Elastic fabric that moves with the body for optimal freedom of movement.

BREATHABLE

Expels moisture away from the skin to the outside of the garment. Keeps cool and dry during intense workouts.

FLATLOCK STITCHING

This way of stitching creates a flat seam. In order to create a higher level of comfort.

WINDPROOF

Protects your body from the wind.

FLEECE INNER LINER

The fleece inner liner provides extra warmth, is soft and feels comfortable on your skin.

LIGHTWEIGHT

Ultralight material that provides a gravity-defying sensation.

QUICK DRY

Quick-drying fabric that expels moisture away from the skin and keeps you cool during sweaty workouts.

REFLECTIVE

Reflective technology increases the visibility in the dark when light the product reaches.

TAPED SEAMS

Taped seams assure a waterproof design.

WATERPROOF

Waterproof fabric that keeps you dry in pouring rain.

WATER REPELLENT

A fabric which has been treated with a surface coating. This coating makes that water doesn't penetrate easily.

STRATEGIC VENTILATION

Strategic ventilation ensures that the product gives extra ventilation on specific parts of the product.

SPACE CARBON

PADDING

The Space Carbon padding is specially made for ultra-long distance rides. This padding represents the latest technology; it has an innovative structure featuring a multidirectional curvature, which makes sure you have a perfect fit and great stability while cycling. The Space Carbon also provides proper support for the sciatic nerve.

- Designed for extra long distances
- Multiple density foam, varying from 120kg/m3 to 60kg/m3
- Maximum thickness of 11mm
- Ultra-high density perineal insert
- · Provides excellent freedom of movement
- Perfect fit and great stability in saddle
- Perforated to improve breathability
- Encased shaping for improved fit
- Made of carbon fibres with antistatic and bacteriostatic properties
- Made with Italian fabrics

//SUGGESTED DURATION

HD ERGONOMIC

PADDING

The HD Ergonomic guarantees superior protection during long distance rides, due to its very high density perineal foam inserts. The foam inserts are designed to deliver great fit and stability in saddle. The pelvic track enhances the anatomic support. Moreover, the perfect combination of perforated foams and different densities assure extra breathability and freedom of movement.

- Designed for long distances
- High density foam, up to 120 kg/m3
- Maximum thickness of 16mm
- Prevents abrasions
- · Provides excellent freedom of movement
- Pre-molded wings
- Perforated to improve breathability
- · Gel inserts to reduce vibrations
- Made of carbon fibres with antistatic and bacteriostatic properties
- Made with Italian fabrics

POWER GEL

PADDING

This padding provides very good protection for long distances, for medium intensive usage (on- and off-road). The Power Gel is specially designed for male anatomy, since it gives a good freedom of movement due to minimum extra volume. Also, the padding is very light weighted and has molded wings. Furthermore, the fabric is soft, has good breathability, and dries quickly.

- Designed for long distances
- High density foam, up to 85 kg/m3
- Maximum thickness of 13,5mm
- Soft touch surface fabric
- · Provides excellent freedom of movement
- · Very light weight construcation with pre-molded wings
- Good breathability and quick dry
- Gel inserts to reduce vibrations
- Made with Italian fabrics

POWER AIR

PADDING

The lightweight PowerAir padding is extra thin and super breathable. These aspects are enhanced by the ventilation holes in the padding and the very high density foam inserts. This foam padding is ideal for a long distance ride on - and off-road, for the inserts are designed to deliver great fit and stability in the saddle

- Designed for long distances
- High density foam, up to 100 kg/m3
- Very light weight construction with pre-molded wings
- Good breathability and quick dry
- Made with Italian fabrics
- Maximum thickness of 13.5mm
- Soft touch surface fabric
- Provides excellent freedom of movement

ENDURANCE HD2.5

PADDING

The Endurance HD2.5 padding consists of a high density foam, which is centrally sewn in. Its special shape offers best protection and fit.

The X-FIFTY fabric has a double layered structure, which helps collect and expel moisture. Moreover, the perforated base layer provides increased breathability and quick dry. In short, the Endurance HD2.5 is best for long rides.

- Designed for long distances
- High density foam, up to 120 kg/m3
- Maximum thickness of 12mm
- Centrally sewed inserts
- Perfect fit
- Perforated to improve breathability
- Made with Italian fabrics

EVO-1 GEL

PADDING

The EVO-1 gel, with its Italian fabric, is specially designed for long distance rides. The padding, with a maximum thickness of 12mm, provides excellent freedom of movement. The pre-molded wings and perforated foam improve comfort. Also, the gel reduces vibrations.

- Designed for long distances
- High density foam, up to 90 kg/m3
- Maximum thickness of 12mm
- · Provides excellent freedom of movement
- Pre-molded wings
- Perforated to improve breathability
- Gel inserts to reduce vibrations
- Made with Italian fabrics

COMFORT GEL

The Comfort gel padding is perfect for medium and long distances. The gel padding reduces vibrations easily. The perforated padding enhances the breathability and the pre-molded wings the comfort.

ACTIVE

PADDING

This padding is ideal for short and medium distance rides. The Active has a maximum thickness of 10mm. The pre-molded wings and the soft touch surface fabric provide excellent freedom of movement.

- Designed for medium and long distances
- High density foam, up to 120 kg/m3
- Maximum thickness of 13,5mm
- Pre-molded wings
- Perforated to improve breathability
- Gel inserts to reduce vibrations

- Designed for short and medium distances
- High density foam, up to 45 kg/m³
- Maximum thickness of 10mm
- Soft touch surface fabric
- · Provides excellent freedom of movement
- Pre-molded wings
